In Phase II of Shinshu smart device cluster project, we are striving to build up the cluster to produce the world wide competitive Smart Device products using nanotechnology & nonmaterial, that is based on the collaboration of industrial technology and leading-edge nanotechnology research and development at shinshu University, Tokyo University of Science, Nagano Prefecture General Industry technology Center and so on. This year at the international workshop, under the theme of public engagement of nanotechnology, we are focusing on standardization of industrial nanomaterial, corresponding to international trend and environmental impact.  
Invited principal speakers and joint researcher the Bremen University in Germany.  
Take advantage of this opportunity for your company and academic. We look forward to welcoming you in Nagano.
