

## Nanotube Tutorial, preceding the NT06 conference

Hotel Metropolitan Nagano, June 18, 2006, 10:00-17:00

### Presenting authors:

#### **“Raman”**

Prof. Mildred S. Dresselhaus ( Massachusetts Institute of Technology)

#### **“Structure”**

Prof. John E. Fischer (University of Pennsylvania)

#### **“Synthesis”**

Prof. Esko I. Kauppinen (Helsinki University of Technology)

#### **“Doping and applications”**

Prof. Mauricio Terrones (IPICYT Mexico)

#### **“Physical properties and simulation”**

Prof. David Tomanek (Michigan State University )

### Topics covered:

Theoretical background and physical properties, synthesis, chemical modification, characterization, electrical and thermal transport, applications.

### Application:

Students and young researchers are strongly encouraged to participate in this session.
